

# CMC Developer Model Software Licenses

- As of June 2018 CMC meetings, all CMC Standard Models use the Educational Community License (ECL-2.0), all documentation uses the Creative Commons Attribution 4.0 International License.(CCL-4.0)
  - ECL-2.0 and CCL-4.0 were found acceptable by developer and member attorneys alike
  - Not all models have had new releases since June, so ECL-2.0 is not reflected in all Standard models currently available
  - Older model releases will not be retrofitted with ECL-2.0
- As of June 2018 CMC meetings, Beta Code releases are released only to
  - CMC members, who have
  - Designated the model for funding, and
  - Signed the Beta Code License Agreement
- Beta Code License
  - Beta Code to be used for evaluation and testing only
  - Redistribution not allowed
  - Available only through Si2 channels, not on developer sites
